

HTTP Error 503.0 - Service Unavailable

The service is unavailable.

Most likely causes:

- An invalid identity in the application pool could cause this error.
- The application pool is no longer running because of configuration or reaching application failure limits.
- The concurrent application request limit was reached.

Things you can try:

- Check the event logs and the HTTP error logs for more information.

Detailed Error Information:

Module	AspNetCoreModuleV2	Requested URL	https://www.sig-net.be:443/nl/Pdf/CourseDetail/8288
Notification	ExecuteRequestHandler	Physical Path	D:\inetpub\vhosts\signet-staging\nl\Pdf\CourseDetail\8288
Handler	aspNetCore	Logon Method	Anonymous
Error Code	0x800704e7	Logon User	Anonymous
		Request Tracing Directory	D:\inetpub\logs\FailedReqLogFiles

More Information:

This error occurs when the worker process was unable to start. This could be due to an invalid identity or configuration, or because the concurrent request limit was reached.
